

Alternative Fuel Vehicles

Liquefied Propane Gas (LPG) and Compressed Natural Gas (CNG) alternative fuel vehicles are an industry still in their infancy. There are currently only 30 manufacturers. Support of this industry is of upmost importance to providers and manufactures. Wiley Metal works with two alternative fuel vehicle providers and supports the industry through our metal fabrication expertise.

Challenges

✓ Support

concept → prototype → pilot → production

✓ Stringent guidelines

precision engineering

metal fabrication

With only 30 manufacturers, the alternative fuel vehicle industry is a young but growing industry. Alternative fuel vehicle manufacturers specialize in the complex technology needed to design these vehicles for transportation. Fabrication support from concept to production as well as the ability to meet stringent guidelines is a must for any supplier.

Solutions

✓ Certification

✓ High Precision

✓ Quality

✓ Communication and Support

Wiley Metal has stepped up to the challenge of becoming a metal fabrication expertise and a strong supporter of this industry. Wiley is both GM certified and our welders are certified. Our high precision team of engineers is a natural fit. Parts are produced with unparalleled consistency and quality. Through open communication, we have learned the goals, processes and regulations that drive their industry, thus leading to greater trust as we learn how to give them the support they need.

Results

✓ Wiley Metal is a "Natural Fit"

Wiley Metal has built ties to a small localized dealer and to a nationwide provider. These two had combined sales of

\$1.35 MILLION
in FY 2014

and are estimated to be

\$2.0 MILLION
in FY 2015
